goPROVE
software for non-profits

A cloud-based data management system for any size organisation which collects, manages and analyses data about clients, volunteers, projects, outputs and outcomes.

Collect - Manage - Analyse

A system designed to be configured by you and meet your individual needs to collect, manage and analyse your data.

Benefits

- Secure and robust - we manage the servers and backups, so that you don't have to
- Completely configurable by your authorised users
- Design surveys and registers to collect your data
- Allows different users to only access the functions and data they require
- Search, filter and report on data in ways that add meaning to your users
- Analyse your data using built-in tools including pre and post, significant change and qualitative word analyses
- Create charts, graphics and word clouds to display your information
- Provide simple ways for your clients to complete registration and survey forms or send in feedback
- User-friendly and intuitive interface
- Best value database solution for non-profits
- Personal, expert support service available*

Affordable, personal support services available on a pay-as-you-use basis covering initial set up, data migration, consultancy, survey design, user training and ranging from a full implementation service to answering your queries.

Features

- Track, manage and communicate with your clients.
- Allow clients, beneficiaries, volunteers, partners and staff to record information and feedback on your projects.
- Configure workflows to define when you collect what data
- Capture data anywhere with our offline apps and sync with the database when next online.
- Attach indicators to your data and display on a live scorecard
- Visual dashboards show the information your users need
- Dynamic, easily modified forms, reports, analyses and charts
- Analysis package to explore beneficiary change, significant differences as well as qualitative word analyses
- Trigger actions to send email alerts and create user tasks
- Invite clients to complete forms by email, or use *Touch* to create a simple menu of client actions
- Attach documents to project records

Create unlimited records, custom fields, charts and reports and receive unlimited survey responses.

** The *Touch* interface provides a simple menu allowing clients to complete surveys, send feedback and manage their details

Live, simple to setup and share charts, reports and scorecards

goProve is in use across four continents and our clients manage thousands of beneficiary records across hundreds of delivery projects, provide tailored reports and dashboards to stakeholders and use the information to prove and improve their projects.

Our clients include Red Cross and Friendship Bridge
